

Introduction

This game is an ideal recap to a lesson or series of lessons on Yr 6 reproduction topics.

Running the activity

There are 50 cards, two to a page, all different. Print out as many pages as you need and cut them in half to make individual cards. Give out individual cards to each pupil. The cards can be laminated and a wax pencil used to mark them.

The teacher has the sheet of key word definitions. Mark or tick off the questions asked during each session. You may wish to substitute definitions targeted at your pupils. The definitions are read out and pupils have to recognise and cross off the key word on their card. The first pupil to cross off all the words on their card receives a small prize. Check the winning card with the class to focus on the words used in the activity. Pupils can write out any definitions they do not recognise.

For a blank file contact nigel.heslop@scienceyear.com

Safety

Not applicable.

More ideas

The questions can be used as the basis of a quiz. Key words could be displayed beside the teaching station. Sticky Velcro patches make a good support for the word display. There should only be a few key words to focus attention on the target vocabulary for that session.

Learning outcomes

- Basic understanding of mammalian reproduction, sex organs, fertilisation, pregnancy, birth

Where the activity fits in

Revising and consolidating
QCA SoW 7B
Reproduction topics

Skills

Vocabulary, recall skills.

✓ Tick these off when used in the session

Sperm:	Male sex cell in humans
Ovum:	Female sex cell in humans
Testis:	Organ that produces sperm cells
Ovary:	Organ that produces ova (egg cells)
28 days:	How often an ovum is released from an ovary
Oviduct:	Name of the tube an ovum travels down from the ovary
Uterus:	Where fertilised ovum develops
Fertilisation:	When two sex cells fuse together
Male and female:	Two different genders
Penis:	Organ that delivers sperm into the female
Vagina:	Where sperm is placed in a woman's body
Half:	Fraction of the genes in a fertilised ovum that come from the sperm cell
Sperm duct:	Tube that carries sperm from the testes to the penis
Menstruation:	Monthly process where uterus lining leaves a woman's body if she is not pregnant
9 months:	Time for human gestation (development of baby before birth)
Fetus:	Name for an unborn baby
Cervix:	Neck of the uterus
Head first:	Direction a baby is usually born
Milk:	Food for a newborn baby
Tail:	Special feature of sperm cell that allows it to move
