

Introduction

A new set of matching cards to develop chemical formulae understanding. The cards are presented as Word files so that you can amend and add to them if you wish.

Running the Activity

There are twenty sets of cards consisting of formula, description, arrangement of atoms and chemical name for an element or compound.

Print out the cards, cut them and shuffle the four piles of cards. Pupils work in small groups to match the correct formula with description, arrangement of atoms and chemical name.

Safety

Not applicable.

Where the activity fits in

Chemistry across the curriculum.
