

Play Top Science and learn more about different careers.

Game 1

How to play

- Play in pairs. Shuffle the game cards. Deal them face down into two piles.
- Pick a category from your first card. Higher score wins, so pick a category with a good score.
- Ask your partner what score they have for the category you have chosen.
- If your partner doesn't have a number for that category, you have to choose another.
- The higher score wins the other player's card.
- Your partner goes next.
- Take it in turns until one player has won all the cards, or until time is up. Then the most cards wins.

Remember...

- You can't change the order of your cards.

Game 2

How to play

- Put the cards on the table picture side down. Shuffle them around the table.
- Looking only at the back of the cards, choose five that interest you.
- Then you can turn over the cards and find out more about the jobs they are about.
