

Index to Resources

A look at various aspects of the teaching of citizenship through science.

Dealing with scientific controversy

A briefing paper discussing scientific controversy, and the limits of evidence and of scientific methodology itself. (Mary Ratcliffe)

About citizenship in a democracy

Some thoughts on the changing nature of citizenship. (Joan Solomon)

Learning from role play

Includes a detailed outline for a new role-play with a scientific aspect, on fox-hunting. (Joan Solomon)

Small group discussions for citizenship

How to manage discussions in class, and what you can get out of them (Joan Solomon)

Glossary of citizenship/values terms

For teachers who don't know their morals from their ethics. A handy checklist of definitions with illustrative examples. (Graham Haydon)

Intended as a helpful summary for teachers and older pupils. Could be enlarged and photocopied and pinned to the wall, where it might also be referred to by younger pupils.

Managing pupil research using the Internet

How to organise your pupils to make the most of the World Wide Web. (Dave Pickersgill)

Templates One and Two

For use with *Managing pupil research using the Internet*.
