

# WIN £350!

---

Encourage students to excel by offering them prizes to the value of £100 – and win your school a cool £250 in the process!

## What?

4 SCIENCE has produced 18 assignments, collectively known as *Science Where You Least Expect It!*, to encourage non-scientists to embrace just a little bit of science – increasing student's skills while quashing a few "science is boring" stereotypes.

And, as an added incentive, 4 SCIENCE, in association with Science Year, is offering a prize to the student that produces the best assignment.

## How?

All you have to do is find the assignments, which are conveniently packaged on the *Can we; Should we?* CD-ROM, and, using the handy teacher guides and stimulating source material, let your students go for it!

All assignments have been written to cover the non-science AS and A level coursework requirements. In doing so they also develop a number of key skills.

## When?

Schools must submit their best assignments by the end of June to the 4 SCIENCE address at the top right of this page. 4 SCIENCE and Science Year will judge the entries, pick a winner and invite them to a prize ceremony in London at the end of September.

At the ceremony the student, together with a representative or two from his/her school, will receive the prize (with a whopping total value of £350), as well as lavish praise and attention!

## Still don't understand?

You can contact 4 SCIENCE for further information about the competition, *Science Where You Least Expect It!*, or for details of other 4 SCIENCE projects.

# Science Where You Least Expect It!

---

## **What?**

4 SCIENCE has produced 18 assignments, collectively known as *Science Where You Least Expect It!*, to encourage non-scientists to embrace just a little bit of science – increasing student's skills while quashing a few "science is boring" stereotypes.

And, as an added incentive, 4 SCIENCE in association with Science Year, is offering a prize to the value of £350 to the student and school that produce the best assignment.

## **How?**

The assignments are conveniently packaged on the *Can we; Should we?* CD-ROM distributed to Heads of Sixth Form/'A' levels with this poster. The resource also includes a handy teacher guide, stimulating source material and details of the competition. Have a look and let your students go for it!

Assignments have been written so they may be used to cover aspects of non-science AS and A2 coursework requirements. In doing so they also enable a number of key skills to be developed.
